

Certificate

on the use of FSC®-certified & recycled material

We hereby confirm that most paper-based packaging of UHU products such as blister cards, wallets and folding boxes as well as outer packaging are made from FSC®-certified material and are distinguishable through the FSC®-label that they carry.

The respective FSC®-labels, which are printed on most of our consumer packaging, contain the FSC license numbers of our suppliers, which are FSC certified according to the chain of custody. Furthermore, the FSC®-certified materials we are using are made from FSC®-Mix, consisting of material from well-managed FSC®-certified forests, recycled materials, and other controlled sources. To learn the exact proportion of recycled material used in a specific packaging, look out for the Moebius loop in the top left corner of the FSC Mix-label. Our paper-based packaging usually consists of 90 % recycled paper.
